Silently killing us, our family and friends, the global plagues are here, yet where are we? Distracted by pastimes, passions, pleasures and psycho-sensory overload: the “Technotronic Era” is here. With it comes a New World of “non-lethal” biological and chemical weapons that are being waged against defenseless civilians. Tetrahedron Publishing Group is offering this “gift” program in support of the House Bill H.R. 2977, known as the Space Preservation Act of 2001. This bill is the first piece of legislation that has come out and openly acknowledged chemtrails; chemical, biological, environmental, climate and tectonic weapons; electronic and psychotronic weapons; as well as laser, sonic and ultrasonic weapons. Many of these technologies have been used covertly on citizens throughout the world. *Death in the Air: Globalism, Terrorism and Toxic Warfare* provides readers with the documentation establishing how this technology is being used as a means of controlling the masses. As more of us awaken to the current dilemma humanity faces, there will be the necessary support for H.R. 2977 and other similar legislation in the future.

Tetrahedron Publishing Group was established in 1978 as a means of communicating Dr. Leonard G. Horowitz’s health and science research worldwide. We are a non-profit company that “tithes” 10 percent of gross receipts to worth while causes. We are happy to bless our communities with this imperative resource.
